**21 Maart 2023**

# Introduction

Dear visitor,

Welcome to our annual Scientica Jobfair! We are happy to welcome you again at the Seats area at the OHL Stadium. This year, we have no less than 26 participating companies, all wanting to have a conversation with you about where you could go with your degree after graduating.

To make it as clear as possible for you, we offer you this company booklet in which all companies are listed. This way, you'll know immediately who is present today and where you might go and listen or have a conversation.

Good luck and have fun!  
Scientica Jobfair Team

All the company info can also be found on the site ([www.scientica.be/jobfair](http://www.scientica.be/jobfair)) for later reference.

## **10 TIPS FOR MAKING THE MOST OF A JOB FAIR**

### **BEFORE THE JOB FAIR**

- ▶ Draw up a list of the participating companies you are interested in (and check their website, vacancies, social media profiles, etc.).
- ▶ Prepare specific questions based on a few keywords that make the company unique.
- ▶ Reflect on your strengths, added value and what you find important in a job.

### **DURING THE JOB FAIR**

- ▶ Talk to the companies that interest you. Connecting with them in a conversation is more effective than, for example, sending an email.
- ▶ Briefly introduce yourself, so your conversation partners immediately have an idea of who they are talking to.
- ▶ Collect business cards so you can refer to your contact at the job fair when applying for a job.
- ▶ Make sure to check out lesser-known organisations too. They often have interesting vacancies as well.

### **AFTER THE JOB FAIR**

- ▶ Are you interested in applying for a job at a specific company? Or would you like to make an open application? Don't hesitate to do this online. Giving your CV to someone at the job fair doesn't mean you applied for the job.
- ▶ Add the company's contact via LinkedIn.

# Our **future** starts with **you**.

**R&D in an international environment with state-of-the-art tools? Join us in building the bridge between research and industry.**

At imec, you **contribute to innovation that improves the lives of all of us**. Together with over 5,500 colleagues, we take on the challenges of tomorrow to ensure better health, safer mobility, sustainable energy, and much more. As a **world leader in nanotechnology**, we shape the roadmap for the semiconductor industry for the years to come and work on technology that is up to 10 years ahead of what exists today. **At imec, you aren't just ahead; you are first.**

We're not exaggerating when we say the world's best infrastructure can be found in our cleanrooms. And **your work makes a difference**. At imec, your novel ideas from academic research are brought towards higher technology readiness levels, making them suitable for industry. **High impact guaranteed**. Take the opportunity to work in a **one-of-a-kind environment with unique expertise and the most advanced technology**. We are looking for:

- researchers
- R&D engineers
- R&D assistants
- performance computing architects
- software developers
- data scientists

At imec, you can also apply for an **internship, thesis project, PhD or Postdoc opportunity**. We offer topics in **engineering, science, and industrial sciences**, for a broad range of activities.

Discover what **imec** offers for **your future** on [www.imec-int.com/careers](http://www.imec-int.com/careers)

**imec**  
embracing a better life

## THE COMPANY

### MAKE THE DIFFERENCE WITH US AND CREATE THE FUTURE

The world is changing fast. We aim to respond proactively to our customers' rapidly changing behaviour and expectations. With more than 42 000 staff worldwide, we work hard every day on cutting-edge, innovative technology that helps both our customers and society as a whole.

We also continuously strive to improve what we do supported by Artificial Intelligence and data analysis. This way KBC can proactively make life easier for its customers.

## CAREER OPPORTUNITIES

### WE ARE TEAM BLUE

Our daily calling is to work together as a single, united Team Blue. Our leaders create a workplace that motivates and stimulates us to grow and develop talents that deliver results. Our reward policy is geared to the needs of current generations and reflects real differences in performance. We're a learning organisation that puts your talent in perspective, discusses the future, talks about opportunities and focuses on development. You decide where your talent takes you.

### WORKING AT KBC

Being a part of our team means:

- #team
- #datadriven
- #learning
- #achieving goals
- #proactive

### JOIN US

Want to find out what it's like to work with us? Visit [www.kbc.be/jobs](http://www.kbc.be/jobs) to join us and experience it for yourself.

## WORLDWIDE LOCATIONS

### HOME MARKETS

## KU Leuven StuVo

Do you want to have your CV screened, do you have a question about a student job, volunteer work or the transition to the labor market? Then visit the career counselors of KU Leuven StuVo during the Scientica job fair. They are happy to help you with your job search!

Be sure to check out the KU Leuven StuVo video series 'Job application process from A to Z'. This series consists of several videos. The video titled 'CV' shows how you can draw up an outstanding CV.

## ACA IT

"The ACA Group navigates you to and into the future by putting sustainable entrepreneurship and the end user at the center of everything we do. In our 4 offices across Belgium (Hasselt, Antwerp, Leuven and Ghent) we have more than 250 driven employees who together focus on innovation, knowledge and quality as core ingredients to go that "extra mile" and customer success every day. Through our open feedback culture and passionate colleagues, we deliver solutions that make customers and employees proud. For over 30 years, the ACA team has been characterized by their accumulated experience in solutions with a focus on:

- satisfied end users (customers and employees),
- stimulating and integrating innovation
- worry-free and secure IT,
- intelligent and focused communication,
- fostering exceptionally efficient teams.

Some of our customers? KBC, Flemish Government, UZ Brussels, Mobile Vikings, VAN IN, Lineas, Group IDEWE.

Feel free to view customer successes in detail at

<https://www.acagroup.be/nl/customer-success-stories>

## Aluminium Duffel

### **“Aluminium Duffel B.V.**

is a European leader in producing and selling aluminum rolling products for very diverse markets (automotive, architecture, construction, consumer products,...) worldwide.

It has state-of-the-art technology, including the widest cold rolling mill in Europe and a CALP (Continuous Annealing Line with Pre-Treatment) production line.

**The production site in Duffel, Belgium,** targets segments such as the automotive and industrial sectors.

What is so special about aluminum? Aluminum is strong, light, durable, flexible, extremely versatile, impermeable, corrosion resistant, an excellent conductor of electricity, non-magnetic, non-flammable, an abundant element in the earth's crust and infinitely recyclable. Aluminum has unlimited potential to be part of solutions that move society forward. Its freedom enables people and businesses to create a better future by innovatively using the versatility that aluminum offers.”

The logo features the letters "AD" in a large, bold, teal-colored font. Below "AD", the words "Aluminium" and "Duffel" are stacked in a smaller, teal-colored font.

# Jobfair 2023

## B12 Consulting

"B12 Consulting is an IT service company based in Brussels Louvain-la-Neuve. We design tailor-made solutions in Software Development, Cybersecurity and Data Science/AI and work on a wide variety of projects, with different and recent technologies. The common points of our projects are complexity, innovation and impact: we focus on complex problems that do not have standard solutions. That's why our team has strong problem-solving skills and a very marked scientific DNA. We are all curious by nature and above all we want to continue to learn!

The special thing about B12 is that, unlike other consulting companies, we develop our projects in-house. In other words, the whole team works in our offices. You'll have then the opportunity to work on very diverse projects, while enjoying a strongly committed and supportive team!

# Jobfair 2023

## BDO

"Welcome to the BDO Family. Committed, Respectful, Personal and a Pragmatic approach are our main values. We take initiative when needed & deliver high-quality work and advice.

BDO is an international consulting firm specialized in Digital Consultancy. Our expertise reaches from general digital advise to the technical support during an ERP implementation or tailor made solution. You will be the bridge between our clients and our services.

Growing together with our clients through a win-win relationship is key to our organisation.

Equal opportunities for everyone while embracing our diversities makes us a warm family. What you see is what you get and we are proud of the successes of our colleagues. So at BDO, you get to add a touch of your own personality to your job!

BDO is part of a strong international network with more than 95,000 Partners and staff active in over 164 countries. In Belgium, BDO has more than 950 Partners and staff spread over the whole country. We work from 11 offices located in Antwerp, Antwerp-North, Brussels Airport, Brussels Centre, Ghent, Hasselt, La Hulpe, Liège, Mouscron, Namur-Charleroi and Roeselare."

# Jobfair 2023

## Belfius Bank & Verzekeringen

"Happy colleagues are just as important to us as happy customers. That's why we invest heavily in their well-being.

You have heard us say it many times: we do more for your Love. But we do not only pamper our customers with the best service and high-performance products, we also invest heavily in the well-being of our employees. With an open corporate culture in an inspiring work environment, and with customized training. Because enthusiastic colleagues who feel good about themselves also do good work.

Will you soon be one of them?

Make a difference: apply now at [belfius.be](https://belfius.be)"

# Jobfair 2023

## Biotalys

### **"Who we are**

The growing demand for healthy, safe and sustainable food has increasingly imposed restrictions on agricultural practices. Therefore, improving food production efficiency in a sustainable way, while safeguarding the environment and its natural resources, is essential.

We at Biotalys have the ambition to transform food protection, shaping the future of sustainable and safe food supply. We are a rapidly growing and transformative food and crop protection company developing a new generation of protein-based biocontrol solutions.

Based on our ground-breaking technology platform, we have developed a broad pipeline of effective and safe products with novel modes of action, addressing key crop pests and diseases across the whole value chain, from soil to plate. Our products combine the high-performance characteristics of chemicals with the clean safety profile of biologicals, making them ideal crop protection agents for both pre- and post-harvest applications.

Our headquarters are located in the vibrant biotech cluster in Ghent, Belgium, and our US subsidiary is based in Durham, North Carolina. More information can be found on [www.biotalys.com](http://www.biotalys.com).

# Jobfair 2023

## What we offer

Teamwork, innovation, passion, well-being and accountability are the Biotalys' values that guide our business and that we prize when we recruit new talent and reward our employees. We strive to create an exciting and dynamic working environment in which you will be challenged to take initiative, contributing to the success of the company. You will work in a multicultural and multidisciplinary team of top innovators in the AgFood Biotech industry who will support you to further develop and grow your personal skills. You will be rewarded with a competitive salary and benefits package and you will have the opportunity to optimize your work-life balance and time management via flexible working hours and telework"

# Jobfair 2023

## BK-Ecosys

“Are you attracted to challenging environmental issues? Then BK-Ecosys might be the ideal company for you!

BK-Ecosys is a multi-talented environmental engineering consultancy. We support our customers in the various domains of environment and environment. As a recognized soil remediation expert, we carry out soil investigations and soil remediation. Our recognized environmental coordinators guide our customers through the Vlare obligations and, as a recognized Tracimat and asbestos expert, we draw up asbestos inventories and demolition follow-up plans.

We unburden our customers during the entire environmental process in the run-up to a permit or transfer. Our customers are mainly B2B and B2G.

BK-Ecosys is at the forefront of important recent developments in environmental legislation. Have you ever heard of PFAS, nitrogen dossier, an energy balance or a sustainability report? Together with our customers and governments, we are building solutions for the future. To this end, we work together with various experts in the field of the environment, urban planning, nature, noise, etc. We are a young and growing company with strong ambitions. Do you want to pull the cart? With us you can even switch between different disciplines during the course of your career, depending on your interests.”

# Jobfair 2023

## Cegeka

### **Who is Cegeka?**

Your contact person within Campus Recruitment Sarah Steenbergen will be happy to help you with questions about jobs and career opportunities. Email: [younggraduates@cegeka.com](mailto:younggraduates@cegeka.com)

# Jobfair 2023

## Dattico

"Dattico is a small start-up consultancy specialized on data and new technologies. At Dattico we believe in "less is more" by attracting smart talent capable of doing big things. Life-balance and autonomy are not an employee benefit – but an important resource that allows us to deliver high-stake projects. Together we have proven ourselves to deliver impressive results. Here are some examples of our prototypes: an Augmented Reality (AR) Analytics interface to visualize data, a dating app which uses the latest AI technology, and we are currently conceptualizing a CSR solution.

Our customers bring interesting projects such as helping their customers shop smarter, looking at credit card behavior or helping develop the latest medicine.

We work in many different industries being supermarkets, credit cards, life science, automobile, and insurance.

If you join us, you will bring your mathematical or IT data expertise to our team to help our customers do more with their data. You will get the chance to work with technologies in both AI and Analytics to show them how they can drive their business using their data. Let us make our customer data-driven!"

## Deloitte

"Do you want to work for a simply irresistible organisation? Where you can be your authentic self and share exciting experiences with a diverse community of passionate people? As one of the largest professional services firms in the world, with more than 6000 employees in 10 locations across Belgium, Deloitte offers everyone endless opportunities. No matter your field of studies, we give you the support you need to find your fit, develop your career, learn every step of the way, prioritise your well-being, enjoy flexibility, and do meaningful work. We select on values and hire for potential, regardless of your background.

We truly believe in creating a diverse and inclusive culture, as it not only empowers our people, but enables us as a firm to better serve our clients: national and international companies, from small and middle-sized enterprises, to public sector and non-profit organisations. What unites us is our Purpose: to connect people and to connect with people, in order to make a positive, enduring impact that matters.

We think boldly, are entrepreneurial, and make decisions based on our Shared Values and the difference we'll make for clients, colleagues, and the wider community."

# Deloitte.

## Geo-IT

"Geo-IT is an independent IT company, specialized in delivering software and IT applications in the field of CAD, BIM and GIS. We grew in 18 years to become one of the most important suppliers in the Benelux of Autodesk software. We also develop our own GIS software for companies and governments based on global open standards, namely Geo-IT GIS™.

More than half of all Flemish cities and municipalities work with our Geo-IT GIS™ applications. Thanks to its user-friendliness, these web applications can be used by anyone to consult maps and related data (land register, inhabitants, permits ...). The users of our software can easily draw and modify geographical objects on maps (land use plans, addresses, green objects, public works, sewer connections, ...). Our software is increasingly used by companies that manage large sites, map utility lines and wind turbines and link them to administrative data.

Would you like to think along and help our customers process their data in a geographical way? Do you like finding your way quirky rather than surfing along mainstream? Then we have a place for you on our team."

## Geo Solutions

"We are a GEO-ICT team (more than 100 people!) with ambitious growth plans! Are you passionate about location technology and do you love IT? Join building our business and discover the power of geodata!"

We offer you a wide range of opportunities: Our projects always serve a sustainability purpose. Themes are telecom, water management, nature, utilities, mobility, industry, home and building management, road building/construction, retail, ...

Within Geo Solutions we concentrate on three domains to help our customers benefit from location.

- **Data:** Policy and business decisions benefit increasingly from location-based data. We can help the customer collect them in a smart way, making the existing databases a lot smarter in a heartbeat.
- **Tools & technology:** Collecting rich data is great. But what about implementing it in the daily processes? With a tool or an app that is easy to use, and made to work brilliantly with your existing software. We can create them here, or send a technology expert the customer's way to help his teams out.
- **People:** Geo-information has the potential to transform your business. Our specialists are frontrunners in their field, helping businesses on a daily basis to embrace this technology and adapt their processes. We can guide the teams in that process too. We are looking for analysts, GIS & technology skills and data expertise.

Want to join our team? Find your place on the map and get in touch: [jobs@geosolutions.be](mailto:jobs@geosolutions.be)"

## GIM – Geographical Information Management

"GIM is an expert in geographic information. Our geo-experts combine their know-how in GIS, Geo-ICT, Location Intelligence, 3D digital twins and Earth Observation to help our clients make better decisions and work more effectively by using spatial data. As an employer, we are actively committed to having a positive impact on society, respecting and protecting the environment, and an open feedback culture within which our GIMers can reach their full potential."

# Jobfair 2023

## IMEC

**"R&D in an international environment with state-of-the-art tools? Join us in building the bridge between research and industry.**

Imec is an R&D hub that brings together bright minds, a first-class infrastructure and an international ecosystem across industry and academia. Imec is a world-leading research and innovation center in nanoelectronics and digital technologies. Imec leverages its state-of-the-art R&D infrastructure and its team of more than 5,500 employees and top researchers, for R&D in advanced semiconductor and system scaling, silicon photonics, artificial intelligence, beyond 5G communications and sensing technologies, and in application domains such as health and life sciences, mobility, industry 4.0, agrofood, smart cities, sustainable energy, education, ...

Imec unites world-industry leaders across the semiconductor value chain, Flanders-based and international tech, pharma, medical and ICT companies, start-ups, and academia and knowledge centers.

Imec is headquartered in Leuven (Belgium), and has research sites across Belgium, in the Netherlands and the USA, and offices in China, India and Japan.

# Jobfair 2023

## MINT NV

MINT is an independent traffic and mobility study agency based in Mechelen.

It was founded by a team of five experienced mobility experts who combined their knowledge and strengths.

Meanwhile, MINT grew to a team of 33 traffic experts.

The training and experience of the various team members in traffic planning and modeling ensures that MINT is an agency with fresh insights into mobility.

MINT's two spearheads are traffic models and traffic planning in which MINT aims to be the leading consultant.

As a company, we are also proud to have received the certificate of Pioneering Employer and put our employees at the center of the new normal of **hybrid working** and **sustainable mobility!**

## NGI – National Geographic Institute

"The National Geographic Institute (NGI) is recognized as a modern and innovative institution for the production and management of geographic data and topographic maps in Belgium.

The NGI contributes very concretely to the government's objectives through its increasing role as a geobroker. As a coordinator and integrator at the federal level, it guarantees geographic reference data for the entire territory. Not coincidentally, the institute is under the tutelage of the Minister of Defense, our privileged partner and still one of the main users of our maps. NGI provides geographic information and services to governments, professionals and individuals alike.

NGI also actively participates in international dialogues on good geodata management (European Union and United Nations) and is the organizer of BeGeo, the annual conference of the geographic information sector at the national level with a European scope.

As an employer, NGI offers a dynamic working environment, varied and stimulating assignments and good development opportunities. The NGI wants to invest in your talents and interests. The profiles we are looking for are varied. Be sure to visit our booth and [our website](#) to learn more about employment opportunities at the NGI."

## Botanical Garden Meise – Plantentuin Meise

### **“Botanical Garden Meise in brief**

The more than two centuries old Botanical Garden is a feast for the senses, a place that charms both the local hiker and the tourist looking for added value. You stroll through a magnificent 92-hectare domain with 18,000 plant species from all over the world: botanical and horticultural collections of world renown! You visit the castle, the huge greenhouses, the gardens, you learn all about wood in the HOUTlab; every day different, every season at its most beautiful. Here science and nature meet in a picturesque historic domain. A botanical jewel in the heart of Europe.

Based on our extensive collections, and using the latest techniques, our scientists gain insight into biodiversity, answer fundamental questions about its origins and find out how ecosystems function in a changing world. Our research contributes to the development of tools for conserving plant diversity. By identifying plants, sometimes even from minuscule or very old remains, our scientists contribute to fields of research as diverse as forensics, archaeology, ethnomyology, monitoring biological water quality, sustainable logging, and investigating wild varieties of commercial crops.”

## Plantentuin Meise

# Jobfair 2023

## Sanofi

"Sanofi is an innovative pharmaceutical company. Through scientific research, the company strives to prevent and combat diseases. We prevent disease through vaccines and provide innovative treatments to combat pain and alleviate suffering. We help both people facing a rare disease and millions of people with long-term chronic conditions. More than 100,000 Sanofi employees in 100 countries are committed to turning scientific innovation into healthcare solutions around the world.

In Belgium, Sanofi is part of the top 10 pharmaceutical companies. In addition, Sanofi is active in Belgium in various stages of care: from Research & Development with clinical studies, the production of biological medicines to registration, commercialization and distribution of medicines. Sanofi Belgium has 1,500 employees in 4 locations: Brussels, Diegem, Geel and Ghent."

## Siggis

"Siggis belongs to the Cevi Group, 6 strong companies under 1 hat (Cevi – Logins – Siggis – SDP – Abiware – Infohos)

Siggis is our company specialized in the sale, integration, development, training and support of geographic information systems (GIS). SIGGIS stands for "Spatial Intelligence Genuine & Generic IT Solutions": the integration of spatial insight into the business processes of organizations. Siggis has approximately 30 employees who are deployed to the customer as consultants. The base is Diegem.

Are you interested in location and IT and are you looking for an open, result-oriented and ethically responsible corporate culture? Then come and talk to a SIGGIS employee. One of the main geo-IT players in Belgium, with offices in Diegem and Ghent.

In our society, "location" is becoming an increasingly important factor. Space is scarce, nature is under pressure and energy is a challenge. SIGGIS' GIS expertise is therefore increasingly in demand. We work in a growing number of domains with an important focus on utilities and governments. We integrate geographic information systems (GIS) based on Esri and VertiGIS products and carry out projects at home and abroad.

Triggered by the changing society, SIGGIS is constantly and rapidly evolving. This requires commitment and alertness from every team member. So at SIGGIS we are moving forward. You will be challenged and given plenty of opportunities to develop technically and personally. Not only do you receive extensive training in the Esri and VertiGIS product range at the start. Siggis also provides ongoing training opportunities and actively participates in our suppliers' international conferences.

# Jobfair 2023

Due to our rapid growth, we are looking for talents who have an interest in location and IT. Together with us you dive into the rich world of GIS and discover the usefulness of spatial data; for which you integrate appropriate IT solutions.

Our goal: "to see what others can't" to ultimately make this world a better place.

Are you interested in the application of geo-IT and are you looking for a job that will help you and society? Then visit us at this job fair or surf to [jobs.cevi.group](https://jobs.cevi.group)"
